

When it comes to on-site safety, you need a building that can meet increasingly stringent regulations as well as provide you with excellent protection against theft and vandalism. That's why Portakabin has developed Portakabin FireSafe - a unique, secure, fire-rated unit. With this purpose-designed building you can increase safety on your site without compromising on quality.

Built-in security

Portakabin FireSafe buildings have been designed to offer the highest levels of fire containment - backed up by our pioneering warranty package. Its unique security features also provide excellent protection against theft and vandalism. Inside, the buildings offer the high levels of comfort you'd expect from Portakabin.

Fire-rated to comply with the Joint Code of Practice on the Protection from Fire on Construction Sites.

Tested and certified by Warrington Fire Research Centre.*
